Oct 11, 2019 It seems Printopia is a complete implementation of the AirPrint protocol, as all of the features work properly, while the other apps just seem to trick the iPhone into thinking it's talking to an AirPrint device when it's not- which explains the problems.. The second option is to ‘print’ documents as PDFs which will then be sent to your Mac ready for use.. Performance The detector is designed to respond in a minimum time of three seconds, this being the signal processing time constant of the circuitry.
